The New Standard in Panelboards

The innovative Quik-Spec™ Coordination Panelboard provides more flexibility, protection and easy selective coordination.

Finally, a 20" wide, UL Listed fusible panelboard that sets new standards for electrical safety and Code compliance. For systems of 600Vac or less and up to 200A, the Cooper Bussmann® Quik-Spec™ Coordination Panelboard provides short-circuit current ratings up to 200kA and makes achieving selective coordination for fused distribution systems easy. No expensive, time-consuming coordination studies to conduct. With the finger-safe CUBEFuse®, branch circuit ratings are available up to 60A. This new, patented fuse/disconnect features ampacity-rejection to prevent overfusing and safety interlock to prevent fuse removal while the circuit is energized.

Take your electrical system to the highest standard of performance – with ease.
